Budimex reopens Poland's largest railway hub after modernization

Amsterdam, November 28, 2025 - Budimex, the Polish subsidiary of Ferrovial, announced today the opening of the largest railway junction in the country, the Warsaw West station, following almost five years of comprehensive modernization. Located in the western part of Warsaw, the station serves up to 60,000 passengers and accommodates nearly 1,000 trains daily.

As part of Poland's National Railways Program, the reconstruction project involved demolishing the former station and building a new one. The new station features a large entrance hall in the northern area, nine surface-level platforms, and an underground access corridor leading to the tracks, which also functions as a shopping arcade.

The new track system spans over 35 kilometers and includes 137 turnouts along with hundreds of railway traffic control elements, such as 191 signals and nearly 580 information displays. The total platform area covers approximately 35,000 square meters and is connected to the passenger walkway by elevators and escalators, making it easier for travelers to navigate.

Next to the platforms is a new station building featuring a spacious main hall and a modern commercial corridor filled with shops and restaurants. A significant aspect of the modernization is Level -1, an underground passageway that is 63 meters wide. Designed with sustainability in mind, the station is equipped with a photovoltaic installation covering over 8,000 square meters, enabling the facility to generate approximately 30% of its own electricity needs.

On average, 600 people and 160 pieces of equipment worked daily to modernize this station—a multifunctional transport and service hub and one of the most technologically advanced in the region.

About Ferrovial

Ferrovial is one of the world's leading infrastructure companies. The Company operates in more than 15 countries and has a workforce of over 25,500 worldwide. Ferrovial is triple listed on Euronext Amsterdam, the Spanish Stock Exchanges (where it is a member of Spain's blue-chip IBEX 35 index) and Nasdaq. It is also included in globally recognized sustainability indices such as the *Dow Jones Best in Class Index* (former *Dow Jones Sustainability Index*), and strives to conduct its operations in compliance with the principles of the UN Global Compact, which the Company adopted in 2002.

About Budimex

Budimex, founded over 50 years ago, has significantly contributed to Poland's economic development through thousands of modern infrastructure and general and industrial construction projects. Thanks to its focus on innovation, constant improvement, and adherence to sustainable development principles, it is one of the leaders in the Polish construction market. Budimex is also active in the renewable energy, waste management, road maintenance, real estate, and electric mobility sectors. The company has been listed on the Warsaw Stock Exchange since 1995 and was included in the WIG-20 index of the largest listed companies in 2024.
