Ferrovial marks 15 years of cooperation and social outreach with more than €10 million invested

- Since 2011, the company has provided safe drinking water and nutritious food to 480,000 people in fourteen countries

Amsterdam, March 25, 2026.- Ferrovial, a global infrastructure leader, celebrates 15 years of cooperation and social action in Spain, Asia, Latin America, and Africa, benefiting over 480,000 people in vulnerable situations. Its “On the Move for Water” and “On the Move for Zero Hunger” projects, with more than 10 million euros allocated since 2011, reflect Ferrovial’s commitment to making a positive impact on people’s lives by creating value and fostering progress in the communities where it operates.

In 2026, Ferrovial will collaborate with Manos Unidas, Fundación Recover, Fundación Agrónomos sin Fronteras, and San Juan de Dios Spain to provide access to clean drinking water in developing countries in Africa and Asia, and to improve social dining facilities in Spain, thereby improving access to quality food for people at risk of social exclusion, benefiting more than 30,000 people.

At a recent event in Madrid, Cecilia Pilar Gracia, President of Manos Unidas; Gonzalo Aldamiz, Patron of Fundación Recover; Gabriel Guzmán, President of Agrónomos sin Fronteras; and Josep Pifarré, General Director of San Juan de Dios Spain, joined Ferrovial’s Chairman, Rafael del Pino, and CEO, Ignacio Madrdejos, to sign these agreements and share their thoughts on the projects.

On the move for water: Basic water access infrastructure

According to the latest data from the United Nations and the World Health Organization, nearly 2.2 billion people worldwide lack access to safely managed drinking water, and 3.5 billion also lack access to sanitation services. These factors are critical for the health, education, and economic development of communities. In response to this situation, Ferrovial has been promoting projects that construct, rehabilitate, and improve water and sanitation infrastructure in vulnerable communities across Africa, Latin America, and Asia for more than 15 years, in collaboration with Spanish NGOs. In addition to financing the projects, the company offers its professionals’ expertise and encourages employees to volunteer, bringing technical excellence and experience to these cooperation projects.

In 2026, in collaboration with Manos Unidas, Ferrovial will facilitate access to drinking water in 15 villages in the state of Rajasthan (India), by designing and installing water infrastructure tailored to each community’s specific needs.

Another initiative will be carried out in the city of Foumban, Cameroon. Together with Fundación Recover, Ferrovial will rehabilitate the water supply, sanitation, and waste management system at Njissé Hospital, in the western region of the country. This infrastructure will include a system for water capture, solar pumping, storage, and purification, to ensure safe drinking water at the hospital.

Finally, in Kinyika (Tanzania), Ferrovial and Fundación Agrónomos sin Fronteras will build a well and a water-capture system, together with treatment and storage facilities, and will equip the local school and healthcare center with latrines to guarantee basic hygiene conditions.

On the move zero hunger: upgrading food pantries

On the Move for Zero Hunger program was launched in 2012, following the economic crisis, with the aim of supporting organizations that fight hunger and malnutrition in the country, which affect the most vulnerable groups. Since its launch, this project has provided dignified, accessible, and safe food to 90,000 people by financing and refurbishing infrastructure, such as social canteens and food banks.

For this edition, Ferrovial will refurbish San Juan de Dios social canteen in Granada, installing an access ramp, renovating the shower area, and upgrading the canteen facilities to improve safety, accessibility, and efficiency. The facilities serve more than 8,000 people every year.

About Ferrovial

Ferrovial is a leading global infrastructure company transforming highways, airports, and energy around the world. Its distinctive integrated business model supports the entire lifecycle of complex projects, from design and financing to construction, operation and maintenance. The company has a global presence and employs more than 22,500 people worldwide. North America is Ferrovial's growth engine, where it has developed and is currently operating five Express Lanes across Texas, North Carolina and Virginia, and is managing the 407 ETR highway in Toronto, Canada. The company is also leading the development of the New Terminal One at JFK International Airport. Ferrovial shares trade under the ticker symbol FER on three stock markets: U.S. (Nasdaq100 Index), Spain (IBEX35), and the Netherlands. The company is included in globally recognized sustainability indices such as the Dow Jones Best-in-Class Index.
