Budimex to build the foundations for the passenger terminal at Poland's new national airport

- The contract, valued at nearly 34 million euros, marks the start of construction on one of Central Europe's most ambitious infrastructure projects

Amsterdam, July 8, 2026. - Budimex, Ferrovial's Polish subsidiary, has signed a contract with Centralny Port Komunikacyjny (CPK) to carry out the foundation work for the passenger terminal at Poland's new national airport, located between Warsaw and Łódź. The contract, valued at 145.9 million zlotys (approximately 34 million euros), marks the start of construction on the largest infrastructure project in the country's history.

"This is a project of strategic importance for Poland and for Central Europe as a whole. We will carry it out with a full sense of responsibility, paying the utmost attention to safety and quality, and with a commitment to ensuring that it makes a lasting contribution to modernizing the country's infrastructure," said Artur Popko, president and CEO of Budimex.

The works will begin in September 2026 and include the construction of more than 8,000 piles and columns with individual lengths ranging from 9 to 30 meters, built using various deep foundation technologies. The total length of the ground reinforcement elements will exceed 140 kilometers. These structures will form the basis upon which the future passenger terminal will be built, with completion scheduled for late 2027.

This infrastructure will make it the most modern airport in Central Europe. It will feature two independent runways and capacity for more than 300,000 annual flight operations. Its activity will generate more than 35,000 direct jobs in the airport area. The project is expected to require an investment of approximately 131.7 billion zlotys by 2032. With this award, Budimex consolidates its position as one of the country's leading large-scale infrastructure contractors and strengthens Ferrovial's position in one of Europe's most dynamic markets.

About Ferrovial

Ferrovial is a leading global infrastructure company transforming highways, airports, and energy around the world. Its distinctive integrated business model supports the entire lifecycle of complex projects, from design and financing to construction, operation and maintenance. The company has a global presence and employs more than 22,500 people worldwide. North America is Ferrovial's growth engine, where it developed and is currently operating five Express Lanes across Texas, North Carolina and Virginia, and is managing the 407 ETR highway in Toronto, Canada. The company is also leading the development of the New Terminal One at JFK International Airport. Ferrovial shares trade under the ticker symbol FER on three stock markets: U.S. (Nasdaq100 Index), Spain (IBEX35), and the Netherlands. The company is included in globally recognized sustainability indices such as the Dow Jones Best-in-Class Index.

About Budimex

Founded more than 50 years ago, Budimex has made a significant contribution to Poland's economic development through thousands of modern infrastructure, general construction, and industrial projects. Thanks to its focus on innovation, continuous improvement, and adherence to the principles of sustainable

development, it is one of the leaders in the Polish construction market. Budimex is also active in the renewable energy, waste management, road and property maintenance, and electric mobility sectors. The company has been listed on the Warsaw Stock Exchange since 1995 and was included in the WIG-20 index of the largest publicly traded companies in 2024.
